THE ART OF LIVING WELL

OUR LIVE WELL PHILOSOPHY

Living well is all about a step up. Enriching your everyday with better experiences. Not just because you deserve it or worked for it, but also because you owe it to yourself to be the best you can be, and give your all to everything you do in life.

TRAVEL WELL TO LIVE WELL

The first step to living well is to address the one thing in your daily lives that impacts you more than you care to analyse. Your daily commute. Living in a city of ever-increasing population and barely sufficient infrastructure can make 'Living Well' difficult. In fact, according to a 2018 NITI Aayog report, residents of Indian metros spend 1.3-1.6X additional time in peak traffic when compared to the rest of Asia. Which is why our prime focus is increasing the quality of your commute. Making your travel to work and back home about more than just 'getting there'.

LET'S EMPOWER OUR EMPLOYEES TO TAKE A REAL STEP TOWARDS LIVING WELL

There's nothing quite like an organization that cares for its employees. Whether it's upgrading to smarter workspaces, or in this case, a productivity-enhancing commute, organizations that help their employees 'Live Well' are the ones that reap the most success. This is the very reason Mahindra is bringing you the Glyd sustainable mobility service. A better life for all.

LIVE WELL THROUGH TECHNOLOGY

Life's beauty lies in our capacity to innovate. Which is Mahindra's everyday mantra when we approach problems. How can we look at things differently? Is there alternative thinking in our solutions? It's questions like these that lead us to innovative engineering. Applying cutting-edge science with the industry's best building minds to engineer new solutions. This is the belief that drives Mahindra's Formula E success, powers the e2o plus, India's first remotely connected electric car, and makes the Battista a hair-raising 1900bhp, 250mph electric hypercar.

WHAT YOU GET WITH GLYD

There are 2 facets to the Glyd experience. One, is the incomparably comfortable, one-of-a-kind electric ride. It's quite something and no words can describe it. You've got to sit in it to believe it. Two, the crafted experience inside. Our Glyd designers have spent a laudable number of hours building the experience inside. Making sure that every Glyder gets more than just a seat and a window view.

WHAT YOU GIVE WITH GLYD

The moment you opt to be transported in the Glyd mobility service, you start giving. Giving back to Mother Nature by polluting less. To society by destroying less natural resources. To your work by arriving fresh and more productive. And to yourself by giving yourself extra hours to mould yourself as you will.

TRAVEL WELL WITH GLYD

WHAT GLYD WILL MAKE YOU FEEL

Refreshed. There's no other word for what Glyd primarily offers every Glyder. Cutting out the ambient engine noise of the vehicle and dampening the peripheral sonics reduces audio fatigue. Glyd's ergonomically crafted interiors add a new dimension to automobile comfort, both in terms of first-ever features and uncompromising space.

WHAT GLYD IS LIKE INSIDE

Your Glyd car has individual cushioned seats inside, providing ample space for each traveller. With only 3 seats, one in the front and two in the back, and privacy screens in between each, Glyd is specifically designed to allow everyone to find their own personal space. Glyd brings its own Widescreen Media Tabs with not just the usual entertainment, but even self-improvement visual courses. Because the value of multiplying your skills is undeniable, and every opportunity to learn is an opportunity worth seizing. Plush comfort is a given. And with your electric ride comes incomparable silence that only a Mahindra electric engine can bring you. Silence, space, and a productive environment. All you ever wanted from your daily commute.

WHY GLYD YOUR COMPANY

Companies across the world are moving towards an era of social consciousness. And we laud your organization for doing the same. But while you work towards a greener tomorrow, you'll find that the right infrastructure can be challenging to implement. That's where Glyd comes in. We'd like to help you achieve your sustainability goals, and Glyd's electric and non-combustive eco-friendly mobility service does just that. Because if there's one thing this approach has proven over time, it's that not only is this great for society at large, but also leads to better business.

BECAUSE YOU CARE

- ⚡ You are a welfare conscious organization working towards a more environmentally sustainable model.
- ⚡ You would not like to compromise on employee safety, which we ensure with our discretionary driver policy.
- ⚡ You would like them to travel by a trusted brand-managed service.
- ⚡ You would like your employees to enjoy flexibility and travel without any hassles.

WHY GLYD YOUR EMPLOYEES

BECAUSE PRODUCTIVITY MATTERS

- ⚡ When your employees travel in a totally transparent, reliable and human-centered mobility service, they arrive refreshed at their destination.
- ⚡ Glyd also provides employees with an opportunity to work as they travel. With Wi-Fi services standard across our fleet, your employees will have the opportunity to make the most of their travel time.
- ⚡ This is a multiplier in terms of productivity and equates to more enthusiasm in their daily tasks with a positive outlook towards challenges.
- ⚡ You want your employees to reach their punctuality goals and arrive fresh and focused.

SUSTAINABILITY & LIVING WELL

LIVING IN BALANCE

We believe that living well should not be at the cost of our planet. Enhanced comforts shouldn't mean extra damage to the environment and ecology. On the contrary, it should help create a better life for all. That's what drives Glyd. A firm belief that we can create balance through innovation and leave a minimal carbon footprint with our mobility solutions.

ENGINEERING WITH A CONSCIENCE

Mahindra's indigenously engineered electric engine is testimony to our efforts toward making a positive change. Both in thinking and mobility. Designed to bring maximum mileage per charge and smooth, trouble-free efficiency, our electric engine is ready to drive a new age of mobility forward.

MAHINDRA'S SUSTAINABLE MOBILITY SOLUTION: GLYD

Glyd is Mahindra's modern answer to travel in our city. A mobility service that's run entirely on electric cars.

LIVING WELL BEYOND TRAVEL

Glyd's Sustainable Mobility Service is just the first step in setting our 'Live Well' philosophy into motion. After all, we are in the innovation business and we won't stop finding better and intelligent ways to make our lives healthier, happier and more fulfilled through ideas and engineering.
